E. Govinthan

Kallakurichi, Tamil Nadu | ph no:8870903542 | email id: egovinthan3@gmail.com

PROFESSIONAL SUMMARY

Final-year B.E. Computer Science and Engineering student with hands-on experience in building practical web applications and completing a cybersecurity internship. Founder and project lead of BugZen, an AI-assisted coding learning and debugging platform. Strong in problem solving, project coordination, rapid learning, and delivering real-world digital solutions.

TECHNICAL SKILLS

- Programming: C, Java,SQL,python
- Web and Application Development: HTML, Supabase, responsive web application development
- Tools and Platforms: GitHub, Visual Studio Code, Vercel, Lovable
- Other: Cybersecurity fundamentals, AI-assisted development, debugging, prompt design

PROJECTS

BugZen - Group project

AI-assisted coding learning and debugging platform designed for students and beginners.

- Designed learning and practice experiences for Python, C, Java, and C++.
- Planned AI code explanation, error correction, quizzes, daily challenges, progress tracking, achievements, leaderboards, and coding battles.
- Developed product requirements, user flows, admin features, certificate verification, feedback workflows, and deployment improvements.
- the project from concept and branding through implementation, testing, deployment, user survey planning, and final-year documentation.

StreamGuard - Boiler Management System | Client Project |Group project

Developed for the Boiler Operations Team at Park Hyatt Chennai to digitize boiler monitoring and operational records.

- Built real-time boiler status and running-hour tracking, shift handovers, safety checklists, maintenance and incident records, worker attendance, fuel-usage calculation, announcements, and PDF reporting.
- Implemented role-based administration, user approvals, shared live updates, document uploads, editable records, and date-range data exports using Supabase and Vercel.

Slidewise - AI Presentation Website

- Designed a topic-to-presentation workflow that generates structured slide content with suitable visuals and templates.
- Planned secure admin access and collection of user name, college, and presentation title before generation.

INTERNSHIP EXPERIENCE

IBM -Agentic AI Intern | 1 Month

- Now doing IBM Agentic Ai in virtual internship

.

EDUCATION

Bachelor of Engineering - Computer Science and Engineering | Final Year
VRS College of Engineering and Technology, Arasur | Affiliated to Anna University

ACHIEVEMENTS AND PARTICIPATION

- Won First Prize in the Payload Paradise technical event at Dhanalakshmi College of Engineering, Tambaram.
- Participated in a technical symposium at Adhiparasakthi Engineering College, Melmaruvathur.
- Created and led BugZen as a student-focused product and final-year engineering project.

SOFT SKILLS

• Team leadership and coordination • Problem solving and decision making • Clear communication and collaboration • Time management and adaptability

STRENGTHS

• Hardworking and self-motivated • Able to work effectively under pressure • Quick learner with a strong interest in new technologies

CAREER OBJECTIVE

To begin my career in a growth-oriented technology role where I can apply my programming, cybersecurity awareness, project leadership, and problem-solving abilities while continuing to learn and contribute to meaningful products.
